⚙️ EXPERIENCE

FullStack Engineer

Betel Dev Company (2020 - 2023)

- **FullStack Architecture:** I designed internal administrative systems to optimize manual processes and improve strategic decision-making.
- **Databases & DevOps:** I implemented SQL and NoSQL solutions, deploying independently on Vercel, Supabase, and own servers.
- **Testing & QA:** I incorporated unit and functional tests, drastically reducing debugging time and ensuring error-free code.

Freelancer

Independent (2020 - Now)

- **Artificial Intelligence:** I conceptualized and integrated AI agents and automation tools into the workflow to accelerate delivery times.
- **Multiplatform Development:** I led the FullStack design and development of hybrid mobile applications and scalable web platforms from scratch.
- **UI/UX & Business:** I designed intuitive user interfaces and experience flows, strictly aligned with the business objectives of each client.

🔧 TOOLS & TECHNOLOGIES

- React
- GIT
- Jest
- UML
- TypeScript
- Socket.io
- SQL / NO SQL
- Next.js
- Expo (React Native)
- Express
- Tailwind
- Vercel | Netlify
- Node.js
- Material UI
- HTML
- CSS
- Javascript
- Figma
- Cursor, MCPs
- Antigravity

🔧 LASTS PROJECTS ([see Github](#))

AI Sales Agent | TypeScript, Express, MCP, Gemini API

- Development of an autonomous agent using the MCP protocol to streamline customer service and automate vehicle sales workflows.

Administrative Management System | Next.js, Node.js, Docusaurus, Unit Testing

- Design and modular deployment of a business platform with 28 modules for the total automation of internal processes and operational control.

University Social Network | Next.js, Supabase, Socket.io

- Development of an MVP of a university social network for the innovation of the systems engineering career
